

*Mercom India's proprietary India Solar Project Tracker is the most comprehensive database of 1000+ large-scale solar projects commissioned and under-development in India, with information spanning as far back as 2010.* The sortable project tracker tracks critical data that includes project developer, size, and region. Other details that are included subject to availability include PPA signing, commissioning dates, tariff, offtaker agreements, etc. These trackers can be customized to meet your company's unique needs.

## Mercom's India Solar Project Tracker has the Details on Utility-Scale Solar Projects

### Who Needs This Report?

- Financial institutions that lend to projects and refinance existing projects.
- Solar module, tracker, inverter, BOS, O&M, EPC, and other vendors looking to sell products to projects.
- Project developers, Investors and Companies seeking acquisition opportunities.
- Foreign companies entering Indian solar market
